

Do You Have Problems With Your Creek? Bank Failures, Erosion, Flooding?

A Workshop for Creekside Property Owners of Lafayette Creek, Las Trampas Creek, Reliez Creek, Happy Valley Creek, and their tributaries

A Free Workshop is offered to you by the Contra Costa County Public Works Department and Flood Control District, the City of Lafayette, the Lafayette Creeks Committee, and the County Streamside Management Program for Landowners (SMPL Program) administered by the California Urban Streams Partnership

Date: December 5, 2024

Time: 7:00 pm - 8:30pm

Place: Cedar Room in the Community Center at 500 St. Mary's Road, Lafayette, CA

Workshop Agenda:

7:00 Introductions of Participants

7:15-7:45 Successful Bank Stabilizations by property owners in the urban bay area and lessons from stream engineering failures

7:45- 8:15 Examples of Restoring Streams In Very Difficult Urban Locations

8:15-8:30 Questions and Answers

Workshop Instructors:

Dr. Ann Riley is a nationally recognized expert on urban stream restoration, and the author of two books on the subject . She has held trainings for federal, state and local agencies and organizations, most recently, the Army Corps of Engineers.

Jessica Hall is the technical expert on the staff of CUSP for the SMPL program. She is a landscape architect with extensive experience in stream restoration stabilization and design.

The workshop will describe do-it -yourself streambank repairs, stormwater controls and how to use the plant based technique of soil bioengineering to engineer a stable bank. Handouts will be provided.

Please or contact Tim Clark with the City of Lafayette if you have any questions
