**Evolution Of A Dream: Update on Lafayette Library**

Designed over 40 years ago to accommodate 15,000 books, the Lafayette Library currently boasts over 59,000 books in its collection. But what began as a need to replace a library that has substantially outgrown its capacity has expanded into a vision that encompasses much more than a new building for books. Although there will be plenty of space for the collection in the new Lafayette Library and Learning Center, the architect is designing a space that will serve as a civic focal point and center of learning. While books are, of course, crucial, a library should also be a place that provides a sense of comfort and familiarity, a place where residents can stay connected with their community and a place where everyone, regardless of age, can continue to learn.

Killefer Flammang architects, winners of the City's design competition, incorporated ideas from more than a 1,000 citizens and have created an impressive design for the new library that will translate these visions into reality. Outside, the contemporary Craftsman structure of stone and wood will meander down the hill from Mt. Diablo Boulevard to First Street, embracing open air spaces, plazas and balconies. Inside, in addition to a large book and periodical collection for adults, there will be a children's library, a teen room, a tech lab, a fireplace with comfortable chairs for reading, several small conference rooms, and a large multi-purpose room for lectures, music recitals and other community events.

Because a library should actively encourage learning in addition to providing resources, Lafayette has enjoined a consortium of the Bay Area’s most distinguished public institutions and non-profits to do just that. These organizations, working together, will provide learning opportunities for adults and children utilizing the state-of-the-art facility at the Lafayette Library. A dozen prestigious partners were invited to participate, and all responded with an enthusiastic “Yes!” (See the story on page two about the Glenn Seaborg Learning Consortium at the Lafayette Library and Learning Center.)

The City of Lafayette continues to be extremely committed to this important project. Final conceptual plans have been embraced and approved by the City Council and Planning Commission, and substantial funds have been made available for design, land acquisition, parking, etc. The City will seek funding from every public funding source, but as in the case of American libraries historically, the new Lafayette Library and Learning Center will ultimately be the product of a major public-private initiative.

This spring, the Lafayette Community Foundation, with the support of a broad array of local organizations, will launch an ambitious but essential $11 million fundraising campaign. All Lafayette residents will have the opportunity to contribute to what is surely the most significant civic project of our generation.

Making this dream a reality will require generous contributions from throughout the community. If you are interested in learning how you can participate, please call the Lafayette Community Foundation c/o Gwenn Lennox at 284-3228.
Introducing the

GLENN SEABORG LEARNING CONSORTIUM

at the Lafayette Library and Learning Center

In the spirit of extraordinary commitment to education, the new Lafayette Library & Learning Center will also be home to a distinguished new resource: The Glenn Seaborg Learning Consortium. Named in honor of Nobel Prize winner and Lafayette resident Glenn Seaborg, the Consortium will bring together a dozen of the Bay Area’s most prestigious educational and cultural resources to offer programs at the new Lafayette Library & Learning Center. Through the Consortium, a wealth of collaborative learning materials, workshops, archives, exhibits, K-12 curricula, lectures, films and discovery centers will be made available to the Lafayette community, particularly its children.

This proposal to leverage the intellectual and cultural resources of twelve urban organizations for the benefit of a suburban population will be the first of its kind at any American public library. According to Diantha D. Schull, President of Libraries for the Future, “The Glenn Seaborg Learning Consortium is a highly important enterprise that will provide an instructive example for other communities and institutions across the nation.”

“I want to express my support and enthusiasm for this visionary initiative. Thank you for the opportunity to extend the reach of the hands-on celebration of sights, sounds and sensations that is Chabot.”
Alex Barnett, Executive Director Chabot Space & Science Center

“A model for the future in which the Lawrence Hall of Science is eager to play a role.”
Dennis M. Power, CEO Lawrence Hall of Science University of California, Berkeley

“Your ambitious vision of what a library situated in a resource-rich urban area can be resonates with the pioneering values of Dr. Seaborg.”
Bruce E. Cain, Director Institute of Governmental Studies, University of California, Berkeley

“The collaboration would not only bring elevated programming to Lafayette area children, but elevate our own institutions through our cooperative efforts.”
Eunice Valentine, CEO Lindsay Wildlife Museum

“The vision of the Glenn Seaborg Learning Consortium is unlike that of any library of which we are aware. We welcome the opportunity to join you in this pioneering effort.”

About Glenn Seaborg (1912-1999)

“There is a beauty in discovery. There is mathematics in music, a kinship of science and poetry in the description of nature, and exquisite form in a molecule. Attempts to place different disciplines in different camps are revealed as artificial in the face of the unity of knowledge. All are sustained by the philosopher, the historian, the political analyst, the economist, the scientist, the poet, the artisan, and the musician.”

GLENN T. SEABORG, upon being appointed Chancellor of the University of California, 1958

Glenn Seaborg was one of the most remarkable scientists of the 20th century and, as an advisor to ten U.S. Presidents, an influential voice on national and international policies. A Nobel Prize winner and forty-five year resident of Lafayette, Dr. Seaborg’s prolific discoveries, which include plutonium and 9 other atomic elements, truly shaped the history of the world.

Dr. Seaborg’s greatest legacy was his enrichment of society through the sharing of knowledge. As a distinguished scientist, beloved teacher, Chancellor of the University of California, Chairman of the Atomic Energy Commission, Director of the Lawrence Berkeley Laboratories, and an outspoken member of the President’s National Commission on Excellence in Education, Dr. Seaborg promoted learning throughout his lifetime.

Dr. Seaborg’s focus on children and his dedication to learning inspired the planners of the new Lafayette Library and Learning Center to propose the creation of the Learning Consortium in Dr. Seaborg’s honor. In his own words, “Whatever the expense of improving education, it is an investment in the future we must make. Excellence costs. But in the long run mediocrity costs more.”
Back in 2001, to address concerns about traffic on Moraga Road, the Council appointed the Moraga Road Transportation Advisory Committee (MORTRAC). MORTRAC is a committee made up of volunteer representatives of the City Council, the Planning Commission, the Circulation Commission, small and large businesses, school interests, senior interests and at-large citizens. Over the course of the last two years, MORTRAC held a number of public meetings during a three phase process designed to identify specific problems, develop and evaluate solutions and recommend an implementation strategy.

**The Problems**

**Congestion:**
- Heavy traffic congestion in the mornings and afternoons make it difficult to turn off of and/or onto Moraga Rd., particularly left turns across traffic.
- Local schools contribute significantly to traffic congestion.
- An increase of more than 30% in “trips-per-household” over the last few years, and growth in Moraga have also made traffic conditions worse.

**Safety:**
- Significant speeding and lack of enforcement results in accidents and unsafe turning to and from side streets and private driveways.
- Lack of pedestrian and bicycle facilities make Moraga Rd. unsafe, particularly for children. Existing road conditions, including poor lighting, limited visibility, rough surfaces and poor drainage could also be improved.

**Solution Options**

Having identified these problems, MORTRAC considered a range of options — from simple maintenance programs to significant physical improvements. MORTRAC debated the costs and benefits of each option and committee representatives also met with Lafayette and Stanley School administrators to discuss ideas that could be employed at the schools.

MORTRAC then developed two lists. The first described a number of interesting but ultimately infeasible solutions. For instance, building a toll lane on Moraga Rd. was determined not to be viable because of significant legal, financial, environmental, and engineering challenges. Other traffic calming measures, such as speed bumps, stop signs and additional signals had major safety and emergency response implications. Suggestions to change the flow of traffic and restrict turns were deemed unacceptable because they would adversely impact access to businesses and shift the problems to neighboring streets.

The second list included more practical solutions, including:

A. Ask the Lafayette School District to consider program(s) modifying locations, habits, and patterns of drop-off/pick-up activities at Stanley and Lafayette School. (Estimated Cost: Ranges from $250 for a sign to hundreds of thousands of dollars to create a satellite parking area.)

B. Increase enforcement of speed laws. (Estimated Cost: $25,000 for a radar display device; unknown costs for photo cameras and additional enforcement resources.)

C. Construct pedestrian paths along both sides of Moraga Rd. (Estimated Cost: $1,000,000)

D. Improve bicycle & pedestrian safety on First Street. (Estimated Cost: $20,000 to modify curb ramps; $100,000 to widen sidewalk on School St.)

E. Negotiate with Moraga to use the yet to be installed Palos Colorados traffic signal to meter traffic on Moraga Rd. (Estimated Cost: None to the City)

F. Implement intersection improvements at Moraga Rd./Brook-School Streets. (Estimated Cost: $10,000 for two electronic signs. $50,000 for intersection sidewalk improvements)

G. Implement an on-going vegetation management program to improve walkway clearance and sight distances at side streets, driveways, sidewalks and around curves on Moraga Rd. (Estimated Cost: Unknown ongoing operation expenses)

The order in which solutions are implemented will depend on availability of funds, availability of staff, environmental review requirements, and the complexity of planning and engineering processes. MORTRAC will develop an implementation plan and present it to the City Council in March 2004. There will also be opportunities for Commission and public input as more details are developed for each recommendation.

A more detailed report of the MORTRAC process and proposed solutions can be found on the City’s website: www.lovelafayette.org.

---

**What’s New?**

- In August ’03, the City’s new tree protection ordinance became effective requiring a City permit for the removal of certain native trees, such as the Giant Valley Oak, Madrone, Buckeye and Black Walnut. The complete tree ordinance can be viewed on the City’s web page under “Zoning Regulations”.

- In late September ’03, after 3 years of public hearings, the Planning Commission approved the largest subdivision in 15 years — 21-lots known as Hidden Oaks. East of Pleasant Hill Rd. in the Saranap area, this single family subdivision will have Leland Drive as its sole access. A public walking trail through this future neighborhood will allow all area residents to enjoy the beautiful grove of oaks adjacent to Reliez Creek.

- The Reliez Valley Walkway extension — Silver Dell to Gloria Terrace — is finished. Residents appear pleased with the results and folks can now run, bike and walk safely.

- The new stoplight at Pleasant Hill and Condit may take some getting used to, but it is doing its intended job of slowing traffic on Pleasant Hill Road, which handles approximately 21,500 cars daily. This light has caused some confusion because it is programmed differently than others around town, resting on red until cars approach instead of cycling on a timed schedule.

- The battlefield grand opening will be held on Saturday, March 6th, 2004 at 10:00 am, rain or shine. The Mayor will announce the winner of the “Name the Park” contest and there will be food and fun for everyone.
NAME THE PARK

Last October, the Lafayette Vistas announced a naming contest for the newly renovated park at 711 St. Mary’s Rd. 94 entries were submitted to the Parks, Trails and Recreation Commission. Several entries were variations of the top five or duplicates sent after the name was first submitted. The nine-member Commission narrowed the list to five names. Now it’s time for you to vote for your top choice.

The name with the most votes will be submitted to the City Council for approval. The winning name will be announced in the City’s Spring VISTAS, Spring Recreation Brochure and of course at the Grand Opening of the Park, which will be March 6, 2004 at 10:00 am.

RULES: You must be a Lafayette resident to vote. Only one vote per person. Voting deadline is February 21, 2004.

You can vote on-line at www.lovelafayette.org. On-line voting is limited to one vote per computer. Other votes can be mailed to Lafayette Parks, Trails & Recreation Department, 500 St. Mary’s Rd. Lafayette CA 94549 or faxed to 925-284-1549.

The submitted names were limited to one of the following categories: natural features, cultural features, geographic features, historic people, families or events related to Lafayette.

Name                  Submitted by               Comments:
- Buckeye Fields    Ruth Kaiser-Barrere          After the buckeye trees growing on the site
- Oak Hill Park     John Otto                  After the many oaks growing on the site
- Saclan Fields     Thomas F. Black            After the native Americans who lived in Lafayette
- St. Mary’s Rd. Park Sally Bellenger         After the road on which the site is located
- Topsy Fields      Julie Taylor               After the beloved horse owned by Lafayette’s first teacher

Community Questionnaire (see back of insert)

The City of Lafayette is soliciting input from the community to develop the best possible plan for the North End of the Lafayette Community Park. The Park is located at 480 St. Mary's Rd. Current access to the North End is via a pedestrian bridge from the Lafayette Community Center and via a pedestrian entrance on Silverado Drive.

We value your input. Please complete the questionnaire on the back no later than February 27, then mail to the address below, fax it to 925-284-1549, or hand deliver it to the office at 500 St. Mary's Rd.

Background

In January 1988, the City Council adopted a Master Plan for Lafayette Community Park. This plan resulted from a ten-year process involving considerable input and participation by the community. The program, goals and general layout for the park, including the North End, are outlined in the plan. Using the Master Plan, a Design Development Plan for Lafayette Community Park was completed in 1991 further defining the design of the park including materials, phasing and costs. Construction of the South End of the park has been recently completed and includes two sports fields, a group picnic area, tot lot, a restroom and parking lot. The next phase of park development will focus on the North End.

North End Description and Guidelines from the 1988 ADOPTED Master Plan

The North End is to be developed as a public park with large un-programmed spaces suitable to a wide variety of activities. Lying between two riparian (creek) zones and an oak woodland, the North Meadow is probably the most pleasant and ecologically rich of the large open spaces on the park site. The quality of the environment is of some importance to people involved in informal sports activities (e.g. frisbee, bocce ball, horseshoes), picnicking, and nature study, as well as large group activities such as festivals and day camps. When cleared of existing brush and young trees, the North Meadow will be a very large flat open space, with a clearly articulated boundary composed of the Riparian Zone and the Oak Woodland. The main trail, accessible to service vehicles, circles the North Meadow. A secondary nature trail follows the top of the creek banks and descends to Las Trampas Creek at one point. The overall North End design shows 8 acres of turf (with overlays of informal sport activities), 1 group picnic area, 10 family picnic areas and 1 restroom.

For more specific information on the Lafayette Community Park Master Plan and the north end of the Lafayette Community Park, access the link from the City of Lafayette website – www.lovelafayette.org or check out a copy of the Master Plan at the Parks, Trails & Recreation Office, 500 St. Mary’s Rd.
1. To what extent do you agree with the 1988 Master Plan description/guidelines (as described on the front of this insert) for development of the North End of the park? (Circle the number that best represents your opinion)
Agree 5 4 3 2 1 Disagree

2. Select the top five park activities you feel should be in the North End? (Rank 1 to 5 with 1 being most important)
Activities included in the 1988 Adopted Master Plan
____ Family Picnic Areas (1-2 tables)
____ Group Picnic Area (20 tables/100+ people)
____ Large lawn area (meadow) for informal uses
____ Nature Trails
____ Horseshoe Pits
____ Bocce Ball
Other activities not included in the Master Plan
____ Dog Exercise Area
____ Petanque Courts (French version of bocce)
____ Children’s Play Equipment Areas
____ Outdoor Amphitheater
____ Sand Volleyball Courts
____ Paddle Tennis (Easier, family/senior version of tennis)
____ Other

3. Have you walked through the North End of the Community Park?
☐ Frequently, weekly or more often
☐ Several times a year
☐ Once or twice
☐ Never
☐ Not sure where Park is located.

4. How close do you live to the Lafayette Community Park?
☐ Adjacent to the Park
☐ Within 3 miles (Note: Park is approximately 3 miles from downtown Lafayette)
☐ Over 3 miles

5. Please list any other ideas and/or concerns you have regarding North End development.

_____________________________________________________________________________
_____________________________________________________________________________
_____________________________________________________________________________
_____________________________________________________________________________
_____________________________________________________________________________

6. What is your age?
☐ Under 18 ☐ 19-24 ☐ 25-34
☐ 35-44 ☐ 45-54 ☐ Over 55

7. Would you be interested in participating in two follow-up workshops this Spring?
☐ Yes    ☐ No
If yes, please print clearly the following information:
Name _______________________________________
Address ______________________________________
_____________________________________________________________________________
Day Phone _________________________________
Eve Phone _________________________________
E-mail _________________________________

Thank you for taking the time to complete this questionnaire. If you have any questions regarding this questionnaire or the Lafayette Community Park North End, please contact Jennifer Russell. Voicemail: (925) 299-3251 or e-mail: jrussell@lovelafayette.org.
